- 1) Solid Polished Brass (un-lacquered)
- 2) Solid Polished Brass- Lacquered
- 3) Antique Brass Lacquered
- 4) Nickel Plated
- 5) OB Oil rubbed bronze (nearly black)

**Bulb Choices:**

E-39 MOGUL bases can be installed.  
otherwise:

E-26 (left) while the most familiar,  
it does not guarantee that LED bulbs  
will be always used. While we  
prefer the "corn" bulb shown (for  
more efficient light distribution), any  
E-26 LED bulb can be used.

GU-10 (right) is an outstanding energy  
saving option. These bulbs ranges  
from 7.5 to 9 watts and each bulb  
has a 100 watt incandescent equivalency.  
The "look" might change a little from  
mnf to mnf...but they all do a great job  
& lock-in the LED decision.

**Most Familiar  
E-26 medium  
base socket-  
bulb is 10 watts  
with has a  
100 watt incandescent  
equivalent**

**GU-10 Socket**
