*49 1/2"  
long*

*18 3/4"  
wide x 10" tall*

**Model 255-LED Office Chandelier.**

A blend of principles for green energy saving & recycling.

The "shade" for the fixture is made from 58 glass tubes nestled & fed thru channels at each end of the light.

These tubes come from recycling old glass, by adding it to new glass material, to form the tubes. The lighting element is a series of five pieces of T8, four foot long, LED tubes. Each tube consumes a mere 25watts of power while yielding 1600 lumens of light. The LED tubes are available in both a 2700K hue and a 4100K hue. A handsome office light.
