**The Horsey Line....© A A B Co 2001 design**

For the horse enthusiasts, we offer some of the nicest solid brass equestrian bathroom/kitchen accessories ever created. These items are all lost wax cast (like bronzes) so the heads of the horses are just like miniature bronzes with outstanding detail down to even veins on the forehead. Just great. In addition, they have been finished with an **antique hi/lo finish**. While it is pleasing for us to offer this fine line, there is just a touch of disappointment. The toothbrush holder was not yet completed at press time (ZH-28) However, it will be identical to ZH-30 (including sizes) but around the edge there will be slots to hold toothbrushes. So...if you wish a complete set...don't fret, you can have it just by putting the ZH-28 on back order. Now, to the rest of the line:

**ZH-20** Curtain tie back. Just fold the curtains behind the plaque, holding the horses head, for an attention drawing piece. Can be used in every room. The plaque is 4 7/8" tall by 3 5/8" wide and projects 6 5/8" to the end of the horse's nose. There is an ample 4" space behind the plaque for the curtain. This items threads into a wooden window surround with a wood screw (supplied)...but...could also be attached to metal with a 1/4" machine screw from behind (not supplied but easily found). **ZH-21** Ah yes...here is a hook that can be used almost anywhere. The detail is so great. Not like those sand cast nightmares from India...but..of miniature bronze quality. 5 3/4" tall by 1 7/8" wide **ZH-25** A face towel ring to be proud of. 10" tall and the ring has a diameter of 6". The backplate 2 5/8" by 5 1/4" tall. Projection 2 3/8".

**ZH-26** Two horses guard the paper. Spring loaded solid brass spindle is a quality component befitting the holder. Overall footprint is 8 1/2" wide. The backplates are 2 5/8" wide by 5 1/4" tall. Projection 2 7/8" for the holder...more with paper.

**ZH-27** A paper holder with only one horse head. Overall footprint is 8" tall by 6 1/2" wide. Holder projects from the wall 2 1/4" but add half the diameter of a roll of paper for the full projection. The backplate 2 5/8" by 5 1/4" tall. **ZH-28** Missing toothbrush holder that will be the same size as ZH-30. Same price too. **ZH-29** Robe hook that is especially nice behind a bathroom door...or...along a wall in a tack room, where there are many showers. The backplate 2 5/8" by 5 1/4" tall. Projection 2 3/8".

**ZH-30** The soap dish we keep referring to. The protruding dish gives this item a bit more in measurement being 3 3/4" wide and having a projection of 3 7/8". The backplate 2 5/8" by 5 1/4" tall. **ZH-31** Nice towel rail. Overall it is 26 1/2" wide with a projection of 3". There is 2 1/8" space between the towel bar and the wall for towels. The backplates are 2 5/8" wide by 5 1/4" tall. Naturally, these can be mounted anywhere including outside where the wranglers wash up. **ZLW-271BL** And who, who likes horses, would pass up a great looking doorbell like this one? Just a class act. The case of the doorbell unscrews for connection of the door bell wires and the button is real bakelite..not plastic. The backplate 2 5/8" by 5 1/4" tall. Projection 2 3/8"
