

ZE-1055R

ZE-1055L

ZE-1055R and ZE-1055L Continuing our pursuit of early R&E hardware, we offer the only lift off door hinge offered in their 1870 catalog. Originally stock numbered as #10, we have added the size and (L) for left and (R) for right handed to the stock number. Beautifully Lost Wax cast (a tiny bit oversize) and then profiled to precision by a CNC milling machine. This is a 5" x 5", lift off hinge with the finial adding 1 1/8" each to the overall length of the knuckle. Antiqued with a hi/lo finish and lacquered. These are outstanding hinges for discerning clients. Note the steel pin for strength & lovely finials. You cannot get better quality..... anywhere !!

ZLW-236 ZLW-237

ZLW-236 (keyhole) & ZLW-237

S-13

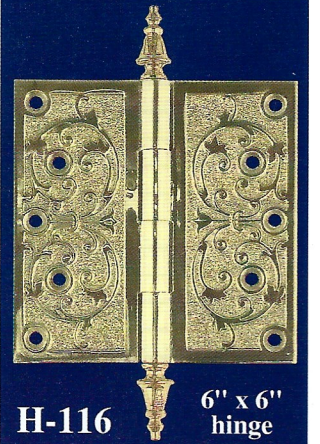

ZLW-351F & ZLW-352FD Precision cast solid brass, polished, "plain face plate" pocket door locks. At first we made pocket door locks by the Lost wax casting process. While aesthetically pleasing and correct, they lacked crisp detail that some folks desired. So...we have perfected them by going over to cold chamber brass die casting. And...Yes...ALL Pocket door locks, design & plain face patterns, are precision cast now. For sizes of 351 & 352, see ZLW-50F and ZLW-51FD in the catalog on page 23.

H-116 The only precision "Cold Chamber" pressure cast solid Brass 6"x6" hinge on the market anywhere. Sure, there are plenty of poorly sand cast ones to choose from out there; but if you want the best, this is the only one. A simple Victorian design but with the strength of 300 tons of die casting pressure which approximates a forging in strength. Finials add 1 5/8" each to the length.

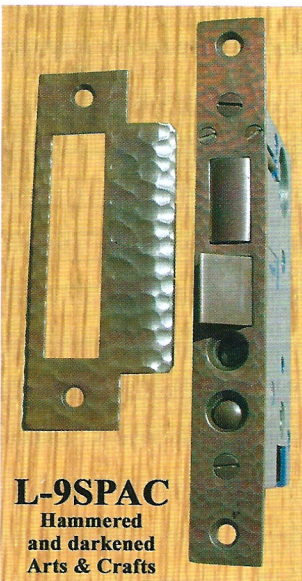

ZLW-278 ZLW-279

Removable steel pin. Leaf thickness at the knuckle 13/64" which tapers to 11/64" at the edge. Nice design on the back too- Beautiful High Polished brass - Not lacquered

H-116 6" x 6" hinge

L-9SPAC Hammered and darkened Arts & Crafts

Arts & Crafts Lock: L-9SPAC (see L-9SP, catalog pg 26, for all sizes)

Here is an old friend wearing a new coat. We have re-designed our very popular L-9SP lock (sold for over 15 years). It now has lovely round lock buttons instead of slashes of metal. We also re-crafted it into an Arts & Crafts masterpiece. Note that this model's face plate is hand hammered as is the catch. Not only that but we have copper coated both and darkened them to match our Arts and Crafts hardware. There are three versions of the Arts & Crafts lock to work with arts and crafts hardware. First there is the L-9SPAC. This takes a sq door knob spindle; used when doorknobs are used on **both** sides of the door. Then there is **L-9SPAC/SL**. This is where one side of the door uses a thumb latch plate (on catalog pgs 43/44) & the other side uses a door knob. Then finally there is **L-9SPAC/DL**, when using thumb latches on **both** sides of the door
