

717-HSA-CH

Continuing combination **Gas and Electric combination fixtures.**

We show the other choice when it came to gas fittings--the candletube and drip saver. A tradition left over from candle times. True milkglass candletubes & drip savers, which **are** included in the price, grace these nice "Victorian" fixtures.

The porcelain socket inside the candletube is the highest quality & accepts a 75 watt chandelier base bulb. All glass shades accept 100 watt bulbs. Glass shades are ordered separately.

Chandeliers

513-MGE-SA Nice combination candle gas and electric pendant ..matching sconces too
Height: 35 1/2", Shortest: 25", Spread: 18 1/2"

717-HSA-CH Full candleabrum 6 light chandelier. Nice formal dining...matching sconces are available for a full room treatment. Height: 45.5", Shortest: 30", Spread: 27",

720-OGE-SA Nice combination- 4 up and 4 down lighting..nice ambience
Height: 45.5", Shortest: 30", Spread: 26.5", Electric shade fitters: 2.25"

Extension kit **1014/18-EXT** can add up to 65", in length, to all the above lights

Sconces (Brackets)

In Victorian times, wall sconces were called "Bracket Lights" or simply "Brackets". Companies such as H.J. Peters of Chicago; Gibson Gas of Phila.; Beardslee Chandelier Mfg Co of Chicago; all made nearly identical "Brackets" changing only minor body parts. The candle brackets shown here come complete with the milkglass candletube and drip savers (bobacees) at no additional cost. Replacements are also available.

605-TRP-SA Triple wall sconce with center milkglass gas candle
Height: 20.5"; Width: 24"; Projection: 17"

707-TRP-SA Triple gas wall sconce with center gas candle
