ZLW-97KH
ZLW-98NK
Gorgeous Lost Wax Cast Brass recessed pocket door handles. One of the finest designs we have ever seen, in this kind of handle. The antique ones, that we bought, had sat in an antique shop for years, with an outrageous price on them; the owner not caring if they sold or not. We cared. 2 3/4” wide by 11” tall. Oval recess: 2” x 4 3/8” & 1/4” deep.

ZLW-98NK

ZLW-51FD

L-74 Unusual deadbolt lock. First the top of the plate has been trimmed to allow it to fit closer to the door opener. 2nd: it *does* have the standard 2 3/8” set back like our L-6. This means that you could use this deadbolt with L-6 and they would be “in-line” with each other. Using L-6 with L-74 is great for antique plates with doorknob centers to keyhole that are non-standard. The minimum c/c distance from the knob to the rd bit of the keyhole is 3 3/4”.

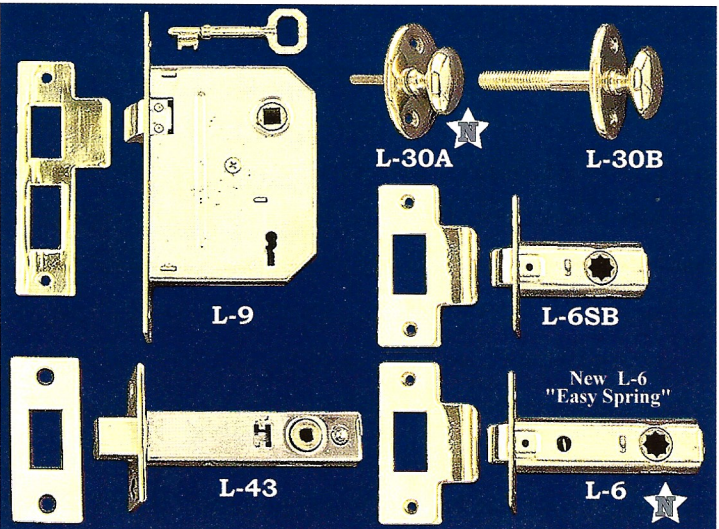

ZLW-54ERH
ZLW-52VRH
ZLW-53RH

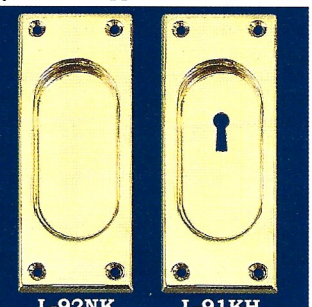

L-6 Latch set for any doorknobs with a square shaft 1/4” to 9/32” square (threaded or not). Our cam bit is star broached so the square shaft can be inserted either on the square or diamond. Latched backset is 2 3/8” which can be installed by drilling 7/8” hole and then recess for the 1” x 2 1/4” latch face. Catch plate: 1” x 2 3/4”

L-6SB This nice short latch set has identical measurements to the standard L-6 except for its’ shorter backset. L-6SB backset is only 1 3/8”. Latch fits all of our doorknob spindles & works great with the L-49 series.

L-9 Victorian style mortised door lock w/-2 keys for square shaft doorknobs Bolt is fully reversible for left or right hand doors. Case Size: 4” tall x 3” wide & 1/2” thick. Backset 2 1/4”. Distance from center of doorknob shaft hole to the center of the round keybit is 2 1/4”. Lock Face: 7/8” x 6”.
