

Barn Lights

These turn of the century lights had several names: Barn Lights or Gas Station Lights or simply Commercial or Shop Lights. What ever you might wish to call them, they have been faithfully reproduced and now meet all UL requirements. The indoor ceiling lights are available either as Electronic Compact Fluorescent or standard incandescent fixtures. Either can be ordered with or without the optional bulb shield and decorative finial. The CF lights normally are supplied with an electronic 26 watt ballast & bulb but can be fitted with lower wattages.

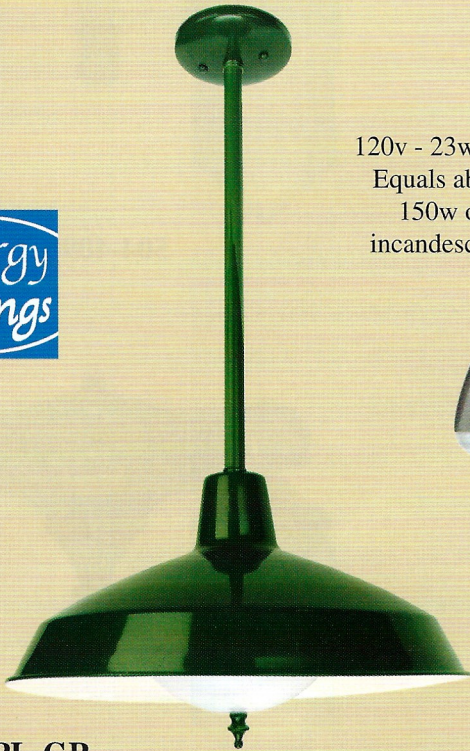

120v - 23w CFL
Equals about
150w of
incandescent.

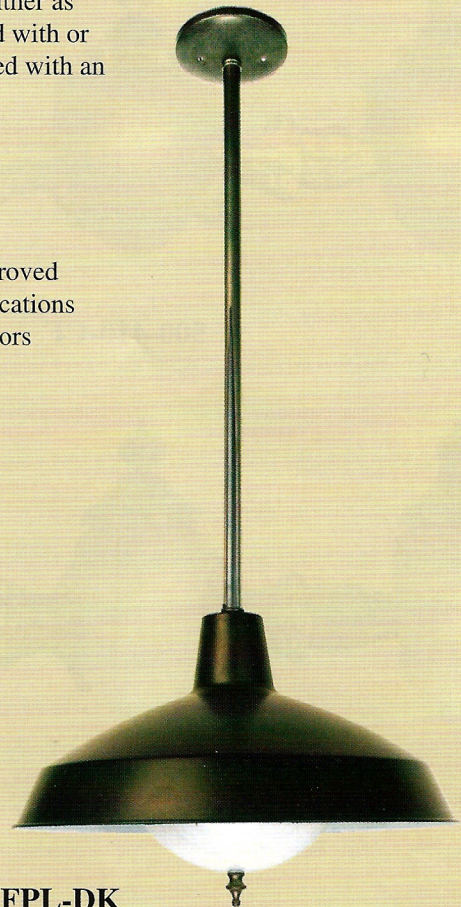

UL Approved
for wet locations
outdoors
