Arts & Crafts- - Solid Copper- - Mailboxes Dozens of hours of work go into making each mailbox as they are made by hand (hand shearing; hand trimming; joining; riviting and thousands of decorative hammer blows). No electrical machines are used. While a bit pricey for a mailbox...it is like anything else in life. You get what you pay for. When this mail box is outside your front door, it will represents you as a person of distinction who appreciates the best of re-cre-

ated Arts & Crafts still crafted by hand. ZC-148-VMB Nearly 15 lbs of solid copper make this 9 1/2"wide by 13 1/2"tall vertical mail box a treat to behold. A nice 4 3/4" depth and visual "see the mail" cartouche to the center front. Can't get better !! **<u>ZC-149-HMB</u>** More than 16 lbs of solid copper make this 13 1/2"wide by 11"tall mail box a treat to behold. A nice 4 3/4" depth and visual "see the mail" cartouche to the center front. Can't get better !!

ZJ-185 Solid Brass quality waterfall, or Deco style, Bat handle. A perfect copy from the 1940's. Complete with a tortoise shell celluloid center as well. Mounts with one center screw. Meas: 4"wide by 1 1/2", 3/32" wrought thickness. Polished brass--just super !

B-55 What a nice piece. Lovely larger lifting handle on finely cast

Arts & Crafts

Solid Copper Face Plate & **Catch** Plate

plate. 6" wide by 3" tall. Fastens with four wood screws thru the front plate.

ZLW-211 Lost wax cast solid brass bin pull w/-lady cameo center-polished. 4 1/2" by 1 1/4"; 3 5/8 c/c. Projects: 7/8'

ZC-299AC....An in production new lock. Arts and Crafts to go with the ZC plates on Catalog page 44. Face plate and catch are "carved" from a solid block of copper hammered by hand ... and the "cast" lock works like silk. Simply quality. Available in late Feb 2002. We just had to shout about it now ... a little. No body else has it

cause nobody else can do it. Simple as that. Competitors want you to buy hardware that costs big \$\$\$ and then use a cheesey zinc lock...not really equitable, now is it ?

						sto ong qqq and then use a cheesey zhie lockhot really equitable, how is it?

L-W53 Quad electrical plate addition to our popular L-W design series of switch plates. So ... we now have single, double, triple and finally the Quad switch plates ... all .. in the same won-

derful cast design. All plates meas: 8 1/2" wide by 4

3/4" tall. **<u>L-W50</u>** is for a massive push button application while L-W51 is to cover those hard fought electrical connections, or, to create that special switch plate

that no one else has. L-W52 sees either a GFI or modern type switch or plug variety combo use, and L-W53 is for that entertainment center, or other place, that has the miriad of connections.

L-W53 Lastly and probably first in high usage, is the four switch option.. most likely for the hallway. All in all...a pretty neat vari-ety to match an already useful L-W suite. AABCo[©] 2001 ZC
