 7.5" x 16 ft length -- finger jointed
 \$ 155.00 per 16 foot piece (9.68 per ft)

PT-PN70A and **PT-CD70A** Clever thought, about use and installation, makes this chair rail a joy to install. Installation: After mounting panels, this chair rail simply fits over the top of the panels to be glued, or, invisibly finish nailed. The sloped top gives a "blended to the wall look" and is more easily maintained. A matching reeded front, to the chair rail & baseboard, matches each panel molding thus giving an harmonious look. A complete solution.
