

## Transom Operator (M-35TW), Measurements

Quality high-end transom window operator. The parts are either extruded brass or "lost wax cast" brass. The window arm, (the part that mounts onto the window), has 5 positions of offset adjustment & can be adjusted from 2 1/2" to 4 1/4" away from the operator shaft. Main shaft is 3/8" diameter, while the lock is squeeze tab with heavy locking spring. All parts are brass & very attractive. Use the drop down menu to select yellow brass, antiqued brass, oil rubbed bronze, or nickel plated.

We also offer an extra-long transom rod, creating a 96" length opener. Use the drop down menu for pricing on the longer rod.

This item requires special shipping. The default shipping charge will appear in your shopping cart/checkout, and the actual freight charge will be added to your order. Save on freight by ordering the full quantity you need in one order.
