

Supplement 4-2a

ZE-632 & ZE-632NK

Are these the most outstanding pocket door handles ever produced in Victorian America by the famous **Russell & Erwin Company**? Well, in our opinion...YES! And we are the only company who found an original "proto-type" and paid thru the nose for it. Size **OA: 11 1/4" x 2 1/8"**. Inset pocket requires a 2 1/4" x 1 15/16" recess, to be 3/8" deep. These gorgeous plates match the knob & backplate, of the same series: in our catalog page 40

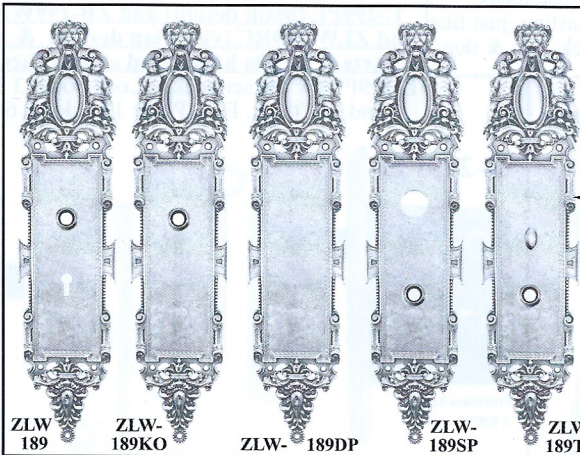

I-R58 Drop Leaf table, light duty, leaf support. Solid brass and made by cold-chamber-pressure-die-casting for spring tension in the "fork" arms. OA Length, pin to pin, is 9 5/8". Max width: 1 7/8". End brackets: 2 1/4" x 1" Antique diagram (supplied) shows use with approximate offset sizes. Small tables only--use a pair, per leaf, for safety. **Not** for tables to be "leaned-on" or heavy loads.

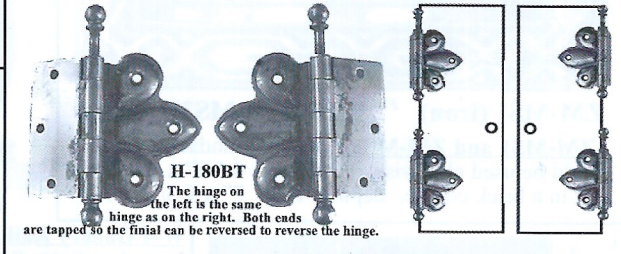

ZLW-221 Series...Deco, deco, deco. Both handle set & cylinder escutcheon Available in 3 finishes ...see stock #s of the picture. The backplate, of the handle, and the escutcheon are carved from a solid block of brass, by a milling machine & are exceptional in both weight and appearance. Want cheap ...nooooo... but quality ...yesss! Backplate of the handle meas: 15 1/4" long by 3" wide. Projects 2" from the surface. Cylinder Keyhole backplate meas: 4" x 2"

Specs for: **ZLW-189 Series** are on catalog pg 25

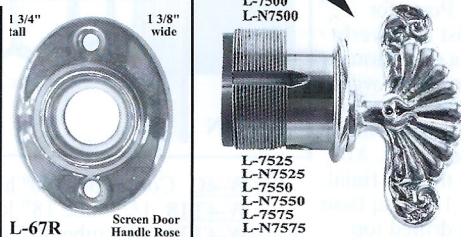

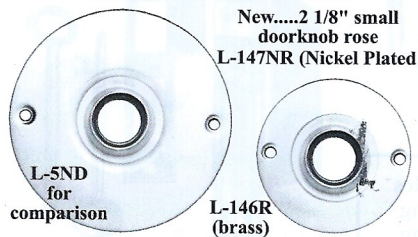

ZLW-490SP

ZLW-490SP & ZLW-490TL Rare entrance door plates made by Sargent just before the turn of the century. Ours, made by Lost Wax casting (like jewelry) and with an antique finish...are simply gorgeous. Fits our Locks L-9SP/SL and L-9SP/DL which can also be ordered "antiqued". Backplate Size: 23" by 3 3/8". Handle projects: 3". The TL version is the inside turn latch (not illustrated) and/or consider using the L-7500 turnlatch (shown to the right) for the inside while using a lock cylinder on the outside.... with two SP plates.

H-180BT...Very neat turn of the century hinge with multiple applications. Heavy Wrought Brass, it has a left hand/right hand convertibility that allows it to be used for any application with lovely results. One hinge does it all. Jam leaf section is: 3 1/2" by 1 1/2". Door Leaf: 4" x 2 1/2". OA knuckle length: 5" w/-balltips. Both ends, of the knuckle, are threaded for pin reversal. Use a drop of lockite on bottom finial to keep snug after set up.

L-146R & L-147NR...Smaller 2 1/8" dia. doorknob plain rose for narrow stile doors. Fits all of our drknobs. L-5ND shown for comparison of how small these really are.

L-67R...Small screen door handle backplate for the L-67 series of screen door hardware that is on catalog pg 24 ..1 3/4" by 1 3/8"

163-CCL-CH

162-CCL-EP

162-CCL-EP & 163-CCL-CH
